FORENSIC CONCESSION & AUDIT INTEGRITY: A naive sorting of companies by raw ROCE without accounting adjustments creates severe analytical blind spots. In the raw Screener.in dataset, 7 uninvestable traps were identified and purged: **Sunshine Pictures** (-28% sales growth; 16,100% 5Y sales variance driven solely by a one-off movie windfall), **Vivid Electromech** (trading at an astronomical 129.57x Book Value), **Stellant Securities** (shell broker with quarterly sales of only ■11.8 Cr), **Kanohar Electricals** (unlisted OTC quotation, missing book value, 41.5x EV/EBITDA), **Cospower Engineering** (23.9x EV/EBITDA on small-scale panel assembly), **Goel Construction** (slowest growth at 11.4%), and **Pushpa Jewellers** (decelerating profit at 20.5%). Conversely, genuine high-moat structural leaders—**Tips Music** (118.5% ROCE, zero debt, IP royalty monopoly), **Indo Tech Transformers** (40.4% ROCE, 765kV grid capex), **Garden Reach Shipbuilders** (>■25,000 Cr sovereign MoD order book), **Oriana Power** (EV/EBITDA 6.49x, 83.7% sales growth), and **Manorama Industries** (global CBE export monopoly)—have been promoted to their rightful institutional anchor ranks.
