*Note: SIGMAADV historical ROE (-4.03%) reflects pre-merger legacy Megasoft IT shell drag, not newly injected aerospace assets.

2. Mathematical Verification & Microlevel Gap Elimination

• **1. Sigma Advanced Systems (SIGMAADV) Surveillance Catalyst:** Trading under NSE "BE" Series requires 100% cash delivery, artificially muting institutional volume. The critical future catalyst is graduation back to the regular "EQ" series, which unlocks mutual fund block buying.
• **2. PTC Industries (PTCIL) Valuation Asymmetry:** At 302x P/E, PTCIL is priced for 5 years of perfection. Any single-quarter delivery hiccup at its Lucknow titanium facility will trigger an aggressive multiple compression.
• **3. Apollo Micro Systems (APOLLO) Debtor Gap:** Debtor days exceeding 200 days create a chronic gap between reported Net Profit and operating cash flows, requiring recurring warrant/capital raises.
• **4. Dynamic Cables (DYCL) Asymmetric Re-Rating:** At 16.5x P/E and 26.2% ROCE, DYCL offers the highest statistical margin of safety in the basket, supported by a record Rs 811 Cr order backlog.
• **5. Shilchar Tech (SHILCHAR) Cost Pass-Through:** CRGO steel and copper inflation are fully shielded by pass-through indexation clauses in export contracts, ensuring sustained 50%+ ROCE.
