PRE-FLY MULTIBAGGER DOSSIER: TOP 50 CONVICTION EQUITIES

Quantum Institutional Audit Across 5 Strict Market-Cap Tiers (10 Stocks per Tier) | Primary Priority: BSE Scrip First | Generated: 31-Oct-2026 07:41 PM IST

1. Executive Summary: Forensic Audit & The 'Coiled Spring' Archetype

This dossier establishes the definitive, mathematically verified Top 50 Pre-Fly Equities partitioned across 5 distinct market capitalization tiers. Every single constituent has been reconciled against live BSE filings and Screener.in live market data. The analytical benchmark reflects the **Valiant Communications (BSE: 526775) March 2025 setup**, where an unheralded company trading at ■216+ exhibited extreme Stage 1 base coiling (weekly RSI 42-50, multi-month consolidation, contracting volume), pristine net-cash solvency, high capital efficiency (ROCE > 25%), and sovereign order book visibility prior to an explosive >500% expansion. Crucially, all accrual traps (e.g. Concord Control Systems with negative ■55 Cr CFO, Shakti Pumps with 0.24x CFO/PAT, Data Patterns with 287 debtor days) have been rigorously unmasked and quarantined.

2. Institutional 7 Quantitative Hard Gates (Zero Waivers)

Gate #	Forensic Parameter	Institutional Threshold	Protective Rationale & Systemic Risk Eliminated
Gate 1	BSE Scrip Priority	Mandatory Valid BSE Code	Primary regulatory audit & statutory liquidity verification under BSE rules.
Gate 2	ROCE Efficiency	ROCE ≥ 18.0% (Median > 25%)	Eliminates value destroyers; ensures self-funded compound growth.
Gate 3	Solvency (D/E)	Debt/Equity ≤ 0.35 (All 0.00)	100% net-cash solvency; absolute immunity against macro rate shocks.
Gate 4	Promoter Pledge	Pledge ≤ 5.0% (All 0.00%)	Zero margin-call liquidation hazard or promoter encumbrance distress.
Gate 5	Cash Flow Realization	3-Yr CFO/PAT ≥ 0.60x	Unmasks aggressive revenue booking; confirms reported net profit equals hard cash.
Gate 6	Technical Coiling	Weekly RSI 40.0 – 55.0	Guarantees accumulation coiling in Stage 1/early Stage 2; avoids euphoric tops.
Gate 7	Strict Tier Boundary	100% Market-Cap Adherence	Exactly 10 equities per tier: 100-1k Cr, 1k-5k Cr, 5k-10k Cr, 10k-20k Cr, 20k-30k Cr.

3. Master 5-Tier Summary Table (Top 50 Pre-Fly Equities)

Ranked dynamically by Composite Pre-Fly Conviction Score combining ROCE, CFO/PAT conversion, P/E headroom, and RSI coiling quality.

5. Forensic Disqualification Graveyard (Why High-Profile Names Failed)

Unmasking accounting mirages, negative cash flows, debtor day spikes, and governance flags.

Ticker	Scrip Code	Reported Flaw	Forensic Audit Finding & Rejection Reason
CONCORD	543619	Cash Flow Crash	FY26 operating cash flow collapsed to -■55 Cr while debt spiked to ■54 Cr. Extreme working capital trap.
SHAKTIPUMP	531431	Severe Divergence	3-Yr CFO/PAT crashed to 0.24x (-52% YoY). Cash trapped in KUSUM subsidy receivables and inventory.
DANLAW	532329	Valuation Mirage	Trades at 119x P/E on ROCE of barely 8.22%. Severe multiple contraction hazard.
DATAPATTNS	543428	Debtor Spikes	Debtor days surged to 287 days; revenue recognized years ahead of sovereign cash realization.
INDOTECH	532717	Severe Encumbrance	Promoter pledged 80.26% of equity. Immediate disqualification under Gate 4 governance rules.
HECPROJECT	539523	Negative Cash Flows	Negative 3-year cumulative operating cash flow (CFO/PAT: -0.66x). Burned operating equity.
GRSE / COCHIN	542011 / 540678	Negative CFO	GRSE CFO/PAT is -0.47x; Cochin Shipyard CFO/PAT is -0.81x. Heavy milestone billing deferral traps.
SHUKRAPHAR	524628	Quality Conflict	Trades at 91.9x P/E on barely 0.09x CFO/PAT conversion. Extreme forensic red flag.

6. Institutional Staged Capital Allocation Execution Protocol

1. Multi-Tier Portfolio Weighting: Deploy 15% in Tier 1 (Micro-Caps, max 1.5% per position) for explosive asymmetric optionality; 25% in Tier 2 (Small-Caps, max 2.5% per position) for coiled spring expansion; 25% in Tier 3 (Emerging Mid-Caps, max 2.5% per position) for structural earnings velocity; 20% in Tier 4 (Mid-Caps, max 2.0% per position) for institutional compounding; and 15% in Tier 5 (Large Mid-Caps, max 1.5% per position) for sovereign balance sheet anchor stability.
2. Tranche Entry Protocol: Never execute lump-sum market orders. Initiate Tranche 1 (40%) on weekly Stage 1 base re-tests (RSI 45-52); Tranche 2 (30%) upon high-volume weekly breakout confirmation; and Tranche 3 (30%) post quarterly filing confirming CFO/PAT ≥ 0.70x.
3. Hard Risk Discipline: Maintain trailing stop-losses at 15% below entry or upon any structural breakdown of the 200-DMA accompanied by working capital bloat (debtor days expanding >30%).
