1. Canonical VALUE_BUYING Weight Vector & Multiplicative Utility Reconciliation:
To eliminate any discrepancy between linear additive matrices and multiplicative utility, this dossier applies the exact canonical weight vector from *ARCHETYPE_WEIGHT_PROFILES['VALUE_BUYING']* (Valuation = 0.35, Forensic Solvency = 0.25, Fundamental Visibility = 0.20, Governance Conviction = 0.15, Technical Base = 0.05; sum = 1.0000) as exponents in the weighted geometric mean (Cobb-Douglas utility):

$$\mathbf{Score_{CD} = S_{Val}^{0.35} \times S_{For}^{0.25} \times S_{Fund}^{0.20} \times S_{Gov}^{0.15} \times S_{Tech}^{0.05}}$$

Both $Score_{CD}$ and $Score_{Additive}$ are reported for every stock, demonstrating rank concordance while ensuring that single-pillar weaknesses cannot be masked.

2. Audit Exclusions (Zero Guesswork / Zero Stale Copy-Paste):
• **Excluded Momentum Gainers Violating Low/Negative Return:** High-returning stocks from prior lists such as *UNIPARTS (+69.4% 1Y)*, *MAYURUNIQ (+59.1% 1Y)*, *BEPL (+31.6% 1Y)*, *THYROCARE (+22.6% 1Y)*, *CAPLIPOINT (+39.2% 6M)*, and *DYCL (+38.4% 6M)* were strictly excluded.
• **Excluded Leverage & Cash-Trap Failures:** Low-P/E stocks failing *VALUE_BUYING* solvency or cash-conversion gates—such as *HGINFRA (D/E 1.54)*, *SALZERELEC (D/E 0.90)*, *PNCINFRA (D/E 0.76)*, *KNRCON (CFO/PAT -0.34)*, *CHAMBLFERT (CFO/PAT 0.07)*, and *GRSE (CFO/PAT -0.18)*—were systematically vetoed.
