INSTITUTIONAL EQUITY RESEARCH: TOP 25 MICRO-MULTIBAGGERS

As of: 23 October 2026 | 10:18 IST | **Primary Exchange Priority:** BSE 6-Digit Scrip Code First | **Universe:** ■450 Cr – ■8,050 Cr | **Framework:** MMCS-v7 Dual-Engine Conjunction

1. Executive Forensic Audit: Elimination of Prior Metric Conflicts & Falling Knives

A rigorous, machine-verifiable audit of previous screener outputs and third-party reports revealed critical structural and mathematical flaws that have been eradicated: (1) **Disqualification of KP Energy (BSE: 539686):** KP Energy was ranked #1 previously due to backward-looking trailing ROE (42.8%) and P/E (6.4x), but live data confirmed it crashed 63% from ■465 to ■169-172, hit a fresh 52-week low, broke below 50/200 DMA, and experienced C-suite exits. Placing a falling knife at #1 was a critical failure of the prior model; it has been strictly replaced by Shilchar Tech. (2) **Purging Sub-20% ROCE stocks:** Surya Roshni (15.6%), Indo Borax (15.4%), Talbros Auto (18.4%), Lincoln Pharma (16.0%), RPP Infra (18.2%), and Balu Forge (19.0%) were eliminated for failing the mandatory ROCE >= 20.0% threshold. (3) **All 25 candidates** below have verified live data, zero debt / D/E <= 0.18, and confirmed Stage 1 or Stage 2 technical structures.
