UNIFIED MASTER FORENSIC AUDIT & MULTI-HORIZON STRATEGY REPORT

Comprehensive Integration: 36-Stock Screen Audit, Top 10 Institutional Alphas, E2E Networks Deep-Dive & 100% Reconciled Portfolio

Verification Date: 2026-11-03 | 16:15 IST	**Macro Regime:** De-Dollarisation, IndiaAI ($1.25B), Physical Capex Supercycle
Key Strategic Anchors: L&T; (21% in E2E), MoD/Navy (GRSE/Krishna), CTU (TRIL/Shilchar)	**Index Benchmarks:** Nifty IT P/E ~19.9x (Trough) vs. Nifty Defence P/E ~55.0x (Peak)

1. Executive Macro Synthesis: Resolving the De-Dollarisation & IT Paradigm

A critical microlevel tension was resolved: De-dollarisation does not mean the immediate demise of Indian IT or an overnight collapse of the USD. Rather, **Nifty IT trades at a cyclical trough multiple of ~19.9x P/E** because enterprise spending was diverted to hardware (NVIDIA GPUs/datacenters). Conversely, **Nifty Defence trades at ~55.0x P/E** driven by sovereign indigenization. The optimal institutional strategy is NOT an extreme binary choice: we anchor **65% in Physical Capex & Sovereign Backlogs** (Defence, Power Grid, Railways), **25% in High-ROCE Cash-Flow Compounders & Trough IT**, and hold **10% Tactical Cash** to buy panic dips.

2. Sovereign AI Cloud Deep-Dive: E2E Networks Ltd (NSE: E2E / BSE: 541578)

CMP: Rs 496.05 (-35.2% from ATH Rs 765)	**Market Cap:** Rs 10,205 Crore ($1.22B)	**Operating Margin (OPM): 70.88%**	**Daily RSI (14): 29.43** (Deep Oversold)
L&T; Strategic Anchor: 21% Stake (Rs 1,407 Cr Deal)	**Primary Entry:** Rs 362.23 (post-split)	**Secondary Entry:** Rs 275.00 (post-split)	**Ecosystem Partner:** NVIDIA Cloud Partner Network

Microscopic Review: 5 Critical Illusions Decrypted for E2E Networks:

• **1. Monopoly Myth:** E2E is NOT a hardware monopoly; Yotta (16,000+ GPUs), Tata, and Reliance are building massive AI clusters. E2E's edge is developer agility (TIR cloud OS) and L&T;'s corporate distribution channel.
• **2. L&T; Cost Basis Reality:** L&T; invested at Rs 362.23 (preferential) and Rs 275.00 (secondary). CMP Rs 496.05 trades at a 37% premium to L&T;'s primary cash infusion. The institutional floor sits at Rs 362, NOT Rs 496.
• **3. SEBI 21% Threshold Strategy:** L&T; stayed strictly under SEBI's 25% takeover trigger to avoid an expensive 26% mandatory open offer at market highs. A future stake increase above 25% would trigger an open offer.
• **4. Optical ROCE Distortion (-0.51%):** High upfront server imports sit in Capital Work-in-Progress (CWIP). Front-loaded 3-year GPU depreciation (Rs 60-74 Cr/quarter) depresses accounting EBIT while cash EBITDA is massive.
• **5. Technical Oversold Strategy:** Daily RSI is oversold at 29.43, but breaking below 552 SMMA creates a thin VPVR shelf. A 3-tranche accumulation strategy is required to neutralize capitulation wick risk.
